

ELPAS

ELPAS-USA FOUNDATION, Inc

We are the WHAT and HOW well defined!

June 14, 2018

Carlos Hernández

Mayor of the City of Hialeah

501 Palm Avenue, Hialeah, Florida 33010

At his hands.-

Ref.: Meeting Request.

Dear Mayor Carlos Hernández:

On behalf of the ELPAS-USA Foundation and of thousands of citizens who are looking for a better future for their family and children, I request again for a Meeting with you and your advisors in social, financial and economic security and stability, in order to expose the "Masterplan ELPAS for the city of Hialeah" that is coming with a legal framework that grants legal viability to the ELPAS project.

We attach a descriptive summary of the integral project for your knowledge, analysis and taking decision. This Masterplan has already been presented and discussed with several Mayors and Administrators of Florida Cities. The results will be published in due time.

According to our research and consultations in public places and by Internet, a project like ELPAS should be considered by any democratic ruler, since it is ideal and perfect to enforce the rights and guarantees contemplated in democratic Constitutions of any participatory democratic state, like Florida.

It is important to note that we are not asking a government for project financing, since we have several national and international financing offers for more than US\$500.00 Million Dollars. In addition, the project has applications that guarantee its self-financing, after pilot projects.

Therefore, there should be no personal or political argument to deny the opening of a dialogue with the exclusive author of the project about a strategic plan for its implementation.

In view of the incalculable benefits and advantages that a project like ELPAS offers to Taxpayers and Voters also of Hialeah (where I live with my family since 1997) and in the event that there is no possible a dialogue with you and/or your Advisors about this project in particular, we are ready and willing to take a complaint to the highest legal, regional and national levels, so that it is the Justice that decides on a unique case in American history.

Sir, more than 250,000 inhabitants of Hialeah await from you and the City Commissioners a positive and affirmative decision about the Masterplan ELPAS that is of highest social, financial and economic interest. Please, do not defraud all your Voters and Taxpayers.

We are waiting for your prompt response.

Sincerely,

Friedrich W Siegel
Founder & President and
Exclusive project owner
