Ref.: Request of evaluation of the ELPAS financial project for the U.S.A.

Dear Mr. President:

First of all, I like to thank you for your letter from August 8, 2018 in which you gave me an explanation and overview of your migration policy. In my cover letter directed to you on July 10, 2018 I introduced to you my ELPAS project with all its social, economic and political applications.

In this project, which is attached again in DVD format, I make concrete and appropriate proposals not only to solve the U.S. migration problem, but also social, financial, economic and political problems that can be resolved by the same platform. The main advantages of this project can be described as the follows:

- a- Is an efficient techno-political solution to resolve the immigration problem of the United States with Latin American countries, offering all countries the same economic and financial system, for example ELPAS-CQE, which makes unnecessary for citizens to leave his country to look in other countries for well-being, security and opportunities which his own country cannot offer due to absence of policy's such as ELPAS-CQE or similar.
- b- Provides a revolutionary monetary and financial method that eliminates the fiscal deficit and budget, without causing public debt and without fiscal reform, see: ELPAS-CQE system attached).
- c- Provides an alternative economic system called "*Productivity Economics for Development and Social Inclusion*" with DSEF-CQE that creates millions of direct and indirect jobs, specifically in the technological field (ICKT's technologies).
- d- Generates more money legally than the world drug trade illegally (see attached: ELPAS legal framework).
- e- Eliminates poverty and misery through abundant cryptographic financing Dollar, c-LATIN, c-Euro, etc.) but controlled and verified by 'Blockchain' technology or similar.

- f- It is technologically viable, socially necessary and politically indispensable to face the great humanitarian challenges of the 21st century.
- g- It is perfect to control and monitor all type of illicit financial business, adopting the most advance and highest secure technology.
- h- Fosters general welfare where is applied.

Mr. President, I consider that a project of this nature that provides such advantages and benefits, first for your country and then for rest of the world, deserves attention and consideration of your government. Several diplomats consulted in different Latin American countries have considered that a project of this nature should be for everyone or for nobody.

Therefore, I ask you, Mr. President, to evaluate this innovative social, monetary, financial and economic project, and if you see it as an important benefit for your country, to apply it in strategic pilot projects. And if the results are positive, you can present it, on behalf of your country, to multilateral organizations such as the Organization of the American States (O.A.S.) and the United Nations. We have financial offers from international lenders.

As author and responsible of this project I am at your entire disposal to answer any question or concern that may exist about the particular.

On behalf of the ELPAS-USA Foundation, I thank you for your attention given to this matter, and I am waiting for your prompt and timely response.

Yours faithfully,

Friedrich W Siegel
 Founder & President and
 exclusive Author of ELPAS projects
